

## INDEX TO VOLUME ONE OF THE POLICY STUDIES REVIEW

The following indexes of subjects and authors cover the four quarterly issues of the first volume of the *Policy Studies Review*. Those issues cover a variety of topics by way of the symposia, the non-symposium articles, and the literature reviews. The symposia especially dealt with anthropology and public policy, state government policy, regulatory policy analysis, and public policy toward risk. The subjects index mainly covers the basic concepts included in the titles and subtitles of the symposia and the non-symposium articles, plus the titles of the books reviewed. The bodies of the articles and the book reviews were also consulted to clarify the concepts derived from the titles. The authors index covers authors of articles, authors of books reviewed, and reviewers of books, but not names referred to in the articles. Future annual indexes will appear at the beginning of the first issue of each volume to cover all the issues in the previous volume.
